# GLARELESS PIN SPOT

---

“ Imagine standing in a beautifully illuminated room, with no glare on the ceiling and no way of knowing where the light is coming from.

The innovative, durable and highly efficient Glareless Pin Spot is the way to achieve this. The LED light source is incorporated in the luminair and the optic is arranged in such a way that it transmits the light through an opening of only 10mm. The LED light source is not visible, which means there is no glare - making it unique in its kind.

# PLASTER RING

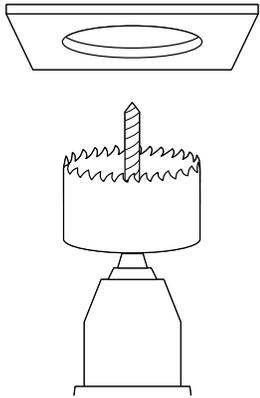

## MOUNTING SPECIFICATION FOR THE PLASTER RING

### STEP 1

- drill a hole in the ceiling with a hole saw of  $\varnothing 88$

#### WHAT YOU NEED:

- Hole saw –  $\varnothing 88\text{mm}$
- Drill

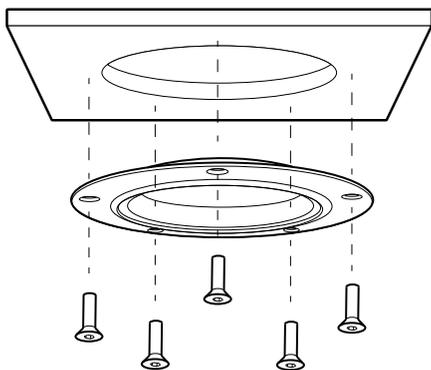

### STEP 2

- Place the plaster ring in the borehole and screw the plaster ring with drywall screws.

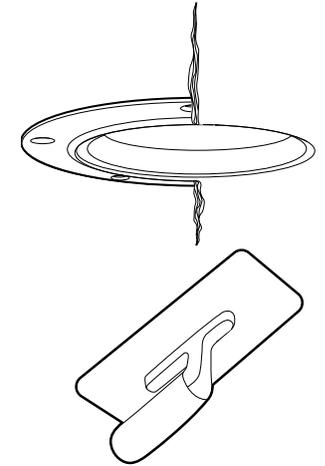

#### WHAT YOU NEED:

- 5x countersunk plasterboard screws
- Screwdriver

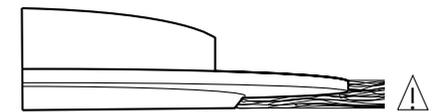

### STEP 3

- Plaster the ceiling.

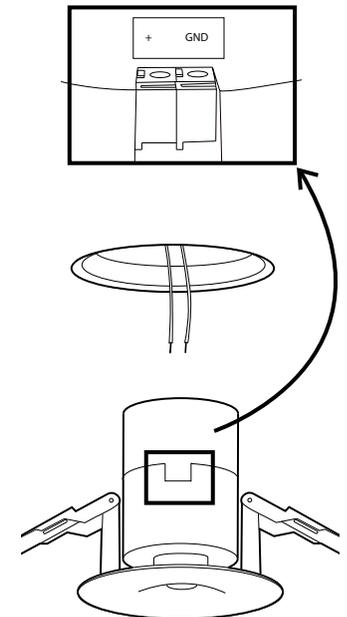

Note: Do not plaster higher than the inner edge of the plaster ring and prevent plaster from entering the ring.

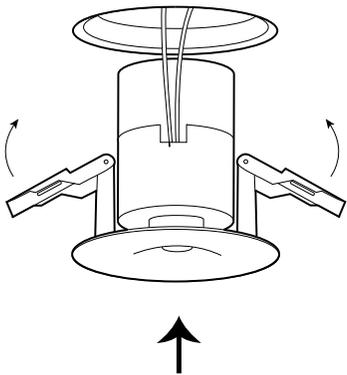

### STEP 4

- Connect the "GND" and the "+" cable to the plug of the spot. To do this, press the orange square down in the plug connection.
- To control multiple spots in a group, see the connection diagram at step 6.

## STEP 5

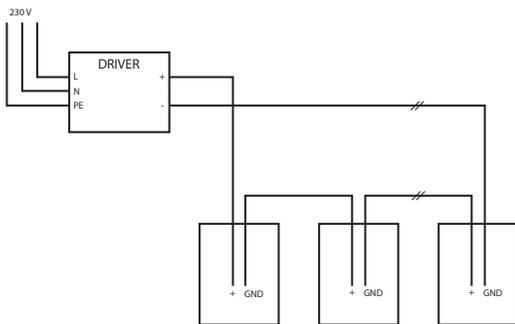

- Squeeze in the springs of the spot and place the spot in the ceiling hole.

## STEP 6

For multiple spots in a group:

- Connect the "+" of the driver to the "+" of the first spot.
- Connect the "GND" of the first spot to the "+" of the second spot
- Connect the "GND" of the second spot to the "+" of the third spot.
- Connect the "GND" of the last spot to the "-" of the GND driver.

Note: This way, a maximum of 4 spots can be put in the series

# CONTRA CONSTRUCTION

INSTRUCTION FOR THE CONTRA CONSTRUCTION

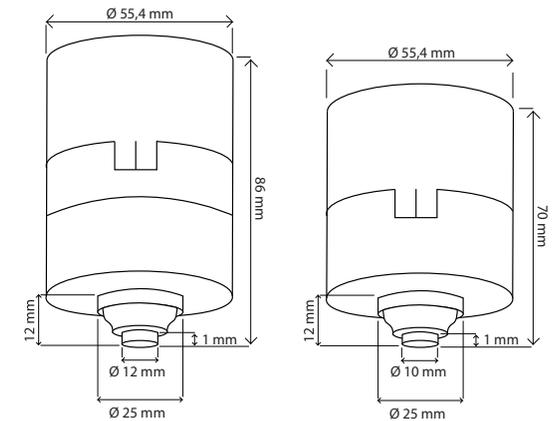

## STEP 1

Mill a hole in the ceiling;

- 10mm for the Single-white
- 12 mm for the Dual-white

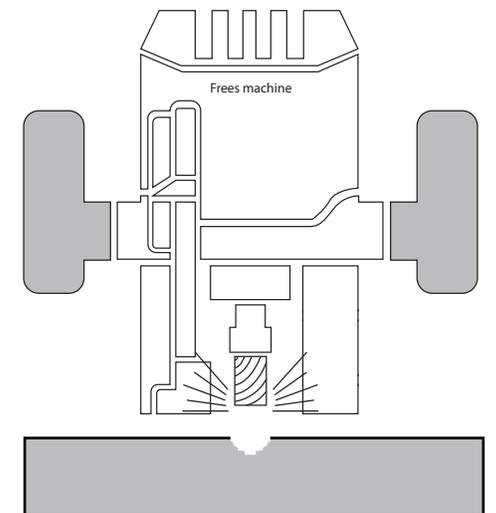

### WHAT YOU NEED

- Power router

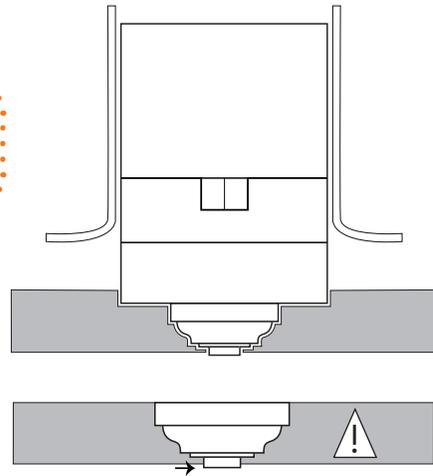

## STEP 2

- Cut out the sheet material in a way that the tip of the spot engine fits.

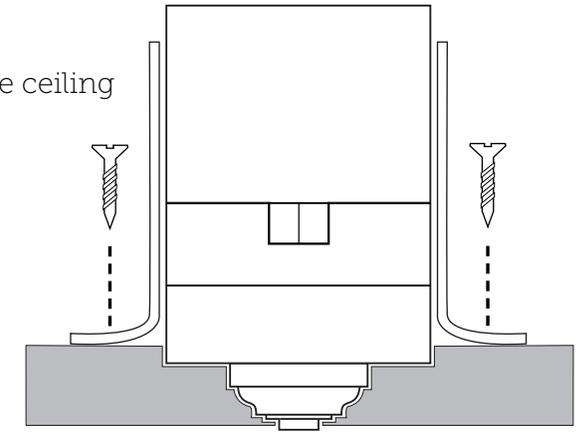

### STEP 3

Note: Make sure the top of the spot comes out just below the plate material.

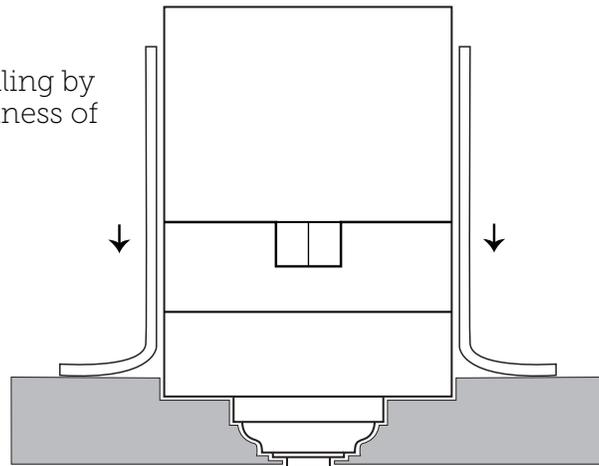

### STEP 5

- Screw the construction into the ceiling

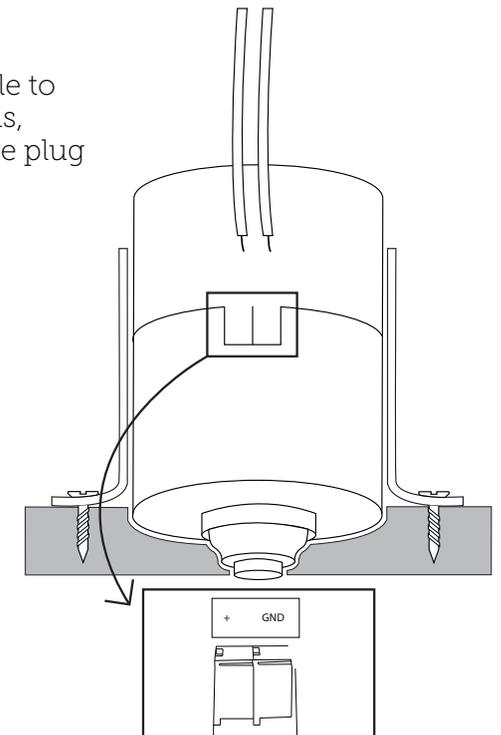

### STEP 4

- Fix the spot on the top of the ceiling by adjusting the side feet to the thickness of the sheet material.

### STEP 6

- Connect the 'GND' and the '+' cable to the connector of the spot. To do this, press the orange square down at the plug connection.
